DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

- **Destructuring** - can use object destructuring to access and use multiple properties of an object which saves you from creating temporary references for those properties, and from repetitive access to the object.
- **Functions** - can create a general method with dynamic parameters that can be changed when called with different values for the parameter. This is useful to reduce the repetition of code.
- **Objects** - can use the literal syntax or braces "{ }" for creating a new object(s) instead of using an object constructor which reduces code and makes it easy to read.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

- **Array -** Using array spreads ... to copy arrays instead of looping through the array and pushing items to the new array but why?
- **Strings -** They say to use single quotes for strings because double quotes are bad but why?
- **Strings -** They say to use template literal for string and combining with reference variable using '${}' but why can't we use quotes for string and '+' to combine with other strings and references?

  let first = 'hello'
  console.log(first+' world')
